

# About GemPharmatech

GemPharmatech Co., LTD. is a high-tech biotechnology enterprise specialized in the development of humanized mouse model and drug screening technology. "Innovation research institute of humanized model and drug screening technology" aimed at keeping establishing novel humanized animal models for medical research and drug development, improving the success rate of the drug screening for biological medicine industry and providing strong support and guarantee.

GemPharmatech is one of the first entities entitled "novel research and development institution" in Nanjing. GemPharmatech has developed a series of severe immune deficiency mouse strains with intellectual property rights, a full set of single and double target immune checkpoint humanized mouse on both C57BL/6 and BALB/c backgrounds.

With support of Jiangsu provincial institute of industry & technology and Jiangbei new area, based on the original resources and technologies of Nanjing university-Nanjing biomedical research institute, GemPharmatech will keep moving on with professional teams and human-oriented animal model innovation technology.

Three core technology platforms:

- Platform of generating humanized animal models;
- Drug screening service platform based on humanized animal models
- R&D platform of humanized antibody derived drugs.
